

# Kyle McCormick

## Frontend Developer

I am a self-taught front end developer and I live within the greater Philadelphia area. I got into programming because it offers a wide variety of topics that are continuously growing, there is always more to learn to challenge myself. I decided to take various courses and obtain certain certificates which have taught me a great deal along the way. Through these courses, I learned that programming can have multiple answers to the same problem. There is always a new challenge to pursue and I am eager to learn.

## PROJECTS

#### Stock Ticker Search (web app)

- App uses react and typescript to function
- Application styled using styled using inline style and bootstrap
- Search bar at top of application to search company stock ticker
- Can enter search with keystroke or submit button
- Stock information pulls up on card (company name/ticker, current price, year high/low, percent change)
- Invalid search if searching for unidentified company ticker

#### Search Robots (web app)

- App was created using react.js and is fully responsive
- Stored various js files ,CSS files and tachyons
- Background gradient and text editing
- Page loads with various cards that hold picture, name, and email
- Search cards by name or email
- Page feed filters out when using the search bar; by typing or erasing
- Title and search bar scroll with user

#### Smart Brain (web app)

- Using react.js and installing various npm packages app has become responsive to every user
- Background styled using moving particles and text editing
- Custom logo created
- Loads user into a "Sign in" or "Register" page
- From there user info is either checked by or added to a database for future sign in purposes
- Database made with SQL
- App function is to load any jpg link and produce a proportional sized photo and check for faces in the image
- Uses clarifai API
- Produces a box around each face
- Each time it is used by the user it adds +1 to their rank

## VOLUNTEER

#### JRA

Throughout the pandemic I would help distribute essential goods to those who were immunocompromised. I would go to the JRA building and pack then go to deliver boxes in my local community.

#### Umpire

For the past few summers I have been umpiring for local leagues in my area. I always enjoyed sports growing up, and baseball was always my favorite. This is my way of helping out but also doing something I enjoy.
